-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

- Species 1: A gold complex with at least one phosphine (PR_3) ligand which does not possess an alkynyl, thiolate, or diphosphine ligand.
- Species 2: A gold complex with at least one diphosphine (R_2PzPR_2) ligands.
- Species 3: A gold complex with an alkynyl ligand and a phosphine (PR_3) ligand.
- Species 4: A gold complex with at least one of both an alkynyl ligand and a diphosphine (R_2PzPR_2) ligand.
- Species 5: A gold complex with a thiolate ligand and a phosphine (PR_3) ligand.
- Species 6: A gold complex with two thiolate ligands and a diphosphine (R_2PzPR_2) ligand.
- Species 7: A gold complex with two halide ligands and a diphosphine (R_2PzPR_2) ligand.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

2. The claims are deemed to correspond to the species listed above in the following manner:

Species 1: claim(s) 7
Species 2: claim(s) 8, 9
Species 3: claim(s) 7, 11, 12, 14
Species 4: claim(s) 8, 11, 13, 21
Species 5: claim(s) 7, 15
Species 6: claim(s) 8, 15, 16
Species 7: claim(s) 8, 10

The following claim(s) are generic: 1-6 and 17-20.

3. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons:

The species lack unity *a posteriori*. The common technical feature shared between all the species is a gold complex. Ikehira et al. (US 2002/0193532 A1)

discloses a gold complex. Therefore this feature is not a contribution over the prior art and does not qualify as a special technical feature, leaving no special technical feature linking the species into a single inventive concept.

4. During a telephone conversation with Abraham Rosner on 10 June, 2008 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
